

Pizza - A Carbohydrate Based Substrate For Tomato Delivery

Maxwell Ogden, Pizza Enthusiasts Institute

May 2017

Abstract

Pizza (Pizza et al. (2000)) is an understudied yet widely utilized implement for delivering in-vivo *Solanum lycopersicum* based liquid mediums in a variety of next-generation mastications studies. Here we describe a de novo approach for large scale *T. aestivum* assemblies based on protein folding that drastically reduces the generation time of the mutation rate.
